Advice for you and your family

▼ Could my symptoms be coronavirus?

The symptoms of coronavirus are:

- a cough
- a high temperature
- shortness of breath

But these symptoms do not necessarily mean you have the illness. The symptoms are similar to other illnesses that are much more common, such as cold and flu.

It's very unlikely to be coronavirus if:

- you have not been in close contact with someone with confirmed coronavirus
- you have not been to a country or area with a high risk of coronavirus in the last 14 days – see our coronavirus advice for travellers

If you think you might have coronavirus, use the NHS 111 online coronavirus service to find out what to do.
